

GREAT TIME SAVINGS AND BETTER MOBILE EXPERIENCE

- The solution has lived up to our expectations. With Telenor MDM, we have at least halved the time we spend on setting up and preparing a new phone. At the same time, I hear from the employees who have got a new mobile that it has been a very good experience because they do not have to spend time and resources to get a new phone up and running. With the Telenor MDM solution, they can simply put the sim card in the phone, and then the apps and data they need is already on the phone. It's easy and efficient.

- Vice Director at LMO I/S, Karsten Lauridsen.

HIGH DATA SECURITY ON MOBILE DEVICES

HjulmandKaptain

- HjulmandKaptain, has with the MDM solution taken an important step, when it comes to compliancy of the EU's personal data regulation GDPR, on mobile devices. The GDPR entered into force on 25 May 2018.

At HjulmandKaptain, we want to ensure that our data on mobile devices does not end up in the wrong hands if a device is lost or stolen. That is the main reason why we have chosen the Telenor MDM solution, because with MDM we can lock the device so it becomes useless if it falls into the wrong hands

- IT-Manager at HjulmandKaptain, Annemarie Lystrøm.

BETTER SECURITY, EASIER WORKFLOWS AND EMPLOYEE BENEFITS

We have been saved for a lot of manual workflows, which means fewer errors. And so it saves time for both our support and employees that we can solve problems remotely. At the same time, support can provide even better service - not only because of the new system, but also because they have gained many important experiences throughout the project.

- Karsten Gottrup, IT-Consultant, Aarhus Kommune

EASY ROLLOUT OF NEW INITIATIVES

We lacked an overview of who had which phones. At Telenor, we have got an MDM solution, which means our employees do not need to worry about downloading and updating apps anymore. Now we can easily roll out new initiatives, and more of our daily workflows and routines have surpassed to the phone.

- Hanne Bak, IT-responsible, Kingo Karlsen

A CLEAR GOAL - AND A TIGHT DEADLINE

We needed a user-friendly solution that ensured a stable and safe operation. At the same time it should pay off financially. With Telenor's MDM we were given a high degree of flexibility so that the solution could be tailored to our needs. Telenor was responsible for implementation from start to finish, and our close cooperation was crucial for achieving the goal of rolling out to 8,000 users in 6 months. With the solution we have heightened security, and we have been spared a lot of manual work as well.

- Hosein Mirshahi, Special Consultant, Aarhus Kommune
